NEOLITH
EXTRAORDINARY SURFACE

Neolith belongs to a new and revolutionary product category born in the last decade with the aim of providing solutions to the most demanding professionals of the industry.

As a Sintered Compact Surface of maximum format and minimum thickness, Neolith is an ideal material for a variety of indoor and outdoor applications in the commercial and residential area: kitchen and bathroom countertops, flooring, cladding, furniture and facades.

After a phase of rigorous trends analysis in different markets; investment in state-of-the-art technology and extensive testing periods, TheSize presents the 2016 season innovations that include 6 new models.

Design, durability, versatility and sustainability are the attributes that best define this innovative architectural material.

Neolith es parte de una nueva y revolucionaria categoría de producto que nace en la última década, para aportar soluciones a los profesionales más exigentes del sector.

Como Superficie Compacta Sinterizada de máximo formato y mínimo espesor, Neolith es un material idóneo para un sinfín de aplicaciones interiores y exteriores, en el área comercial y residencial: encimeras de cocina y baño, pavimento, revestimiento, mobiliario y fachadas.

Tras una fase de análisis de tendencias y estilos en distintos mercados, Neolith presenta sus "Novedades 2016" que 6 nuevos modelos.

Diseño, durabilidad, versatilidad y sostenibilidad, son las características que mejor definen este innovador material arquitectónico.
